DETAILED ACTION

1. The amendments and arguments/remarks filed on 08 July 2009 have been entered and fully considered.
2. The information disclosure statement (IDS) filed on 08 July 2009 has been entered and fully considered.

Allowable Subject Matter

Claims 1 and 58-97 are allowed.

The following is an examiner's statement of reasons for allowance:

The instant Application recites an apparatus and method of using an apparatus having a sensor comprising a substrate and a plurality of thin film probe structures that undergo thermoelastic responses when excited by electromagnetic radiation, a radiation source, a means for directing radiation, and a transducer for observing thermoelastic responses.

Similarly to the instant Application, U.S. Patent Application Publication 2004/0180369 (Franzen et al.) discloses a photothermal detection strategy in paragraph [0013] and Fig. 1 that discloses a surface to which a plurality of capture probes is

attached. Franzen et al. discloses that the strategy employs light energy, which elicits heat, and the use of a thermocouple, a type of transducer, for detection, or the use of a charge coupled device. However, the foreign priority of the instant Application is earlier than then earliest disclosed filing date of Franzen et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
